One clue crossword answers word of the day

Photo: Pixabay (Pexels)For some reason, many people believe that the ability to solve crossword puzzles is a doped talent at birth for a select few. That couldn't be further from the truth. Crossword puzzles are not an immutable test of your vocabulary or intelligence—they are a learned skill that anyone can develop. Learning new skills is one of the best ways to become marketable and happy, but... Read more No other word game or puzzle asks for both your brain and crossword puzzles. The experienced puzzles consider not only the literal meaning of each track, but also the similar ones they've seen before, often repeated responses, syntax quirks, puns, cultural references—and, of course, the theme of the puzzle. Unfortunately, this means that crossword puzzles can be unwelcoming to newcomers. Everyone starts somewhere, and no matter how your skills look now, here are four general strategies to help you improve. Do puzzles every dayThe only way to improve on crossword puzzles is to do many of them, and the best way to do this is to work them out in your daily routine. For me, that means tackling some puzzles from an old book of 365 crossword puzzles by Will Shortz before bedtime every night. My mother prints Washington Post crossword puzzles and chips them over breakfast; my friends who travel by bus or train are fans of New York Times crossword apps. The puzzles of the New York Times are the damn spokesperson of most people for a reason: they are easy to find and have a built-in difficulty of classification. Mondays are the easiest, Saturdays are the hardest, and the puzzles between ramps on a day-to-day life, so you can choose the ones that work for you. That said, the New York Times is far from the only editor out there. The Washington Post, Los Angeles Times, and Merriam-Webster also publish daily American-style crossword puzzles; If cryptic crossword puzzles are your jam, try The Guardian. Some organizations, such as Queer Crosswords and Puzzles for Progress, will even send original themed puzzles as a reward for non-profit donations. Just remember that each publication has its own style —mastering the complicated clue phrase in a Saturday New York Times puzzle won't necessarily translate to one from the Post, and vice versa. Use an AppIf you really want to increase your crossword puzzle, signing an app like this one from the New York Times is a great idea. As much as I love them, paper puzzles just can't touch the easy-to-use features you get with an app. You can easily check your work or reveal letter answers by letter instead of spy on the whole solution. This demystifies enough clues to make them viable, which is exactly what you want. In addition, most applications time your work, which makes it easier to measure your progress. But in fact, the biggest advantage is accessibility: carrying thousands of digital puzzles in your pocket makes it easy to perform many puzzles. Know When — and How - to CheatCheating is a sensitive topic among crossword enthusiasts, crusades, there's no denying you have your place. Crossword puzzles should be fun, and repeatedly banging my head against the same wall, praying for a different result, is not my idea of fun. Moreover, frustration is a terrible teacher; Unless you have serious competitive puzzle aspirations, teefully refusing to look for answers or check your work won't get you anywhere. Many games require a great investment — at least, if you want to have the best gear, the... Read moreObviously, you must solve all the clues you can without help, but you can't improve without a challenge. A little strategic cheating can guide you through even the toughest puzzles. Apps make this super easy: just check or reveal letters one at a time until you can solve a particularly nasty clue. This gives you just enough information to (mostly) hack it on your own, which in turn makes it the most likely answer to stay in your memory. Paper puzzles make strategic cheating a little more difficult, but thanks to the Internet, not by much. If you're stuck in a printed crossword, google the whole clue in quotes. Framing your search around the track instead of, say, how many cards you have to work with will help you understand what the clue wanted from you. Over time, you will find yourself needing less and less help solving puzzles that previously would have been true stumps. Study UpIf you are serious about the domain of crossword puzzles, the Internet is full of people who would love to help. A blog like Rex Parker's is a great place to start. He solves the New York Times puzzle every day, likes the difficulty to other puzzles that day of the week, and breaks the main pairs of clues/responses in a short post. Between posts and comments, you'll get a more complete picture of the solution than if you'd just looked at the answers. You can also specialize even more and review your crossword puzzles—words that often appear in crossword puzzles, but almost never in conversations. The New York Times has a test that tests your crossword knowledge, and there's a more general guide to Dictionary.com. Perhaps predictable, there is also an entire site dedicated to crossword puzzles, with a new word presented every day and an extensive archive. If a statistical approach is more your speed, there are crossword response databases out there. Data scientist Noah Veltman analyzed a set of clues and crossword responses from the New York Times from 1996-2012, then organized them by crossword puzzles and how often they appeared. You can filter lists by the minimum number of appearances or word length, and see details about any response. Similarly, Xwordinfo.com the most popular answers and clues to the Times puzzles by year or word duration. Hell, you could actually go all out and code up some training programs like this guy did, although it's unclear if your approach is more effective than just doing a lot of crossword puzzles. That's not to say you should build a robot or memorize clues to solve crossword puzzles efficiently; the best training strategy is the one that makes you happy. No matter how many puzzles you solve, or how fast you can solve them—just get you to keep up with it. If you can do this, you will never stop improving.
